

Shoulder Program

The following are examples of common diagnoses seen by physical and occupational therapy:

- Shoulder impingement
- Adhesive capsulitis
- Humeral/clavicular/scapular fractures
- Osteoarthritis
- Pre/post-operative rotator cuff repair
- Humeral dislocations
- Humeral subluxations
- SLAP lesion repairs
- Bankhardt repairs
- Joint replacement
- Various inflammatory conditions such as tendonitis and bursitis

The PT or OT will determine the appropriate course of treatment to be provided on an individual basis. Post-surgical patients will be treated within the protocol provided by the prescribing physician. Treatment will vary according to the diagnosis of each patient.

This facility and its affiliates comply with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex.
