

Feeding Difficulties in Young Children

Many children have feeding difficulties. If you have any concerns about a child's eating abilities/habits, Occupational and Speech Therapy can help address areas of concern.

Occupational Therapy services can address sensory issues related to food. Speech Therapy services can focus on the specifics of swallowing and chewing to facilitate the child eating food.

Feeding difficulties can include:

- Picky Eaters
- Difficulty Swallowing
- Difficulty Chewing
- Nervous to touch food
- Weight loss
- Unable to eat a variety of foods
- Aversion to food texture
