

Salli counted on us for pain management.

Severe arthritis, degenerative disc disease and six surgeries over 30+ years left Salli Callahan in agony. Constant back pain forced her to recline or lie down every few hours to get a little relief. Fortunately, Dr. Lesco Rogers and the Wythe Center for Pain Management were ready to help. Today, Salli's pain has decreased dramatically, and she says, "I got my life back!"

From the routine to the unforeseen, count on us.
