

Linda counted on us  
for pain management.

**Back pain** continued to torment Linda Harman, even after two surgeries. In search of relief, Linda turned to Lesco Rogers, MD, at the Wythe Center for Pain Management. Dr. Rogers helped identify activities that would contribute to Linda's pain and recommended an outpatient injection procedure instead of surgery. Linda is thrilled with the results, and enjoying her role as head of a church food pantry. She said, "Dr. Rogers and his staff are excellent!"

**From the routine to the unforeseen, count on us.**
